DETAILED ACTION

1. This office action is in response to amendment filed on Jan. 05, 2006 and Apr. 03, 2006.
2. Claims 1-13 and 16 have been amended.
3. Claims 14-15 have been canceled.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-3, 9, 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Akhterruzzaman (2004/0203929).

Regarding claim 1, 9, and 16, Akhterruzzaman discloses an enhanced caller identification comprising: a first wireless mobile station (see fig.1, element 1 and its description); and a second wireless station coupled with the first wireless mobile station through a wireless communication network (see fig.1, elements 1, 2, 3-6 and its description), wherein the second wireless mobile station transmits location information to the wireless first mobile station in response to a request of the first wireless mobile station (see fig.2, steps 201, 203, 205 and its description).

Regarding claims 2, 10, Akhterruzzaman further discloses the second wireless mobile station comprises a receiver for receiving a satellite signal from a satellite (see fig.1, element 11, and its description).

Regarding claim 3, Akhterruzzaman further discloses wherein the second wireless mobile station analyzes the satellite signal in response to the request of the wireless mobile station, determines the location information and provides the determined location information to the wireless mobile station (see fig.1, element 11, fig.2, step 205 and its description).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4-8, 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Akhterruzzaman (2004/0203929) in view of Van Diggelen et al. (2004/0203915) and Gwon et al. (2004/0203904)/Strong (2003/0007473).

Regarding claims 5-8, 11-12, Akhterruzzaman discloses all the subject matters described in rejected claims above, except for explicitly disclose the second wireless mobile station comprises a memory for storing the location information. However, Van Diggelen a mobile station comprises a memory for storing the location information (see fig.2, elements 230, 234 and its description). Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use the Van

Diggelen's memory in Akhterruzzaman's invention in order to store location information of the wireless device for improving the use of mobile systems.

Regarding claims 4 and 13, the Examiner takes Official notice that the signal transmitted and received between the wireless base station and the wireless mobile station satisfies IEEE 802.11 specification is notoriously well known in the art in order to establish and manage communications between wireless base station and the wireless mobile station also described in Gwon's reference (2004/0203904) (see abstract) or Strong's reference (2003/0007473) (see paragraph [0086]).

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
